

Passport™ P2 AC Plus 2 Port AC/DC Multi-Charger Manual Addendum

DYNAMITE DASHBOARD APP

It has come to our attention the manual for the Passport P2 AC/DC Multi-Charger did not included instructions for using the mobile app. The information in this addendum covers operation of the Dynamite Dashboard App.

BLUETOOTH CONNECTION

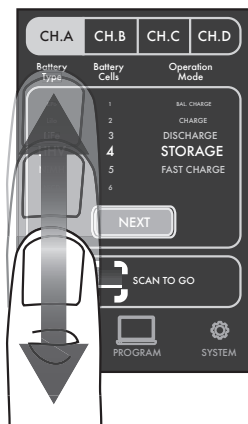

Download the Dynamite Dashboard App from the iOS store or Google Play store. All Charger features are accessible from the app.

Compatible with iOS and Android devices

1. Download the Dynamite Dashboard App from the iOS or Play Store.
2. Install the app and verify the Bluetooth is activated on the mobile device.
3. Power on the charger, and open the app. The app will open a dialog box that says Bluetooth Device, touch the line that says charger to connect. The Bluetooth Icon will illuminate on the charger when it is connected.
4. Set a password the first time the app is opened. We suggest writing the password on the back of the charger in permanent marker.

USING THE MOBILE APP

1. Touch and slide the selections to scroll between options.
2. Press the NEXT button when the correct selections have been made.

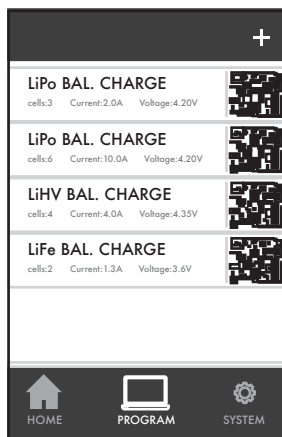

SCAN TO GO

The Passport P2 can be automatically set with the SCAN TO GO feature by scanning a compatible QR code. Check your battery for a compatible QR code. If you need to add one, a QR code can be generated from within the Battery Memory section.

HOW TO GENERATE A QR CODE:

1. Add battery memory settings to match your battery.
2. Touch the QR code next to the battery memory, save it to the Gallery on your device.
3. Print the QR code and apply it to your battery.

Example settings shown, the app does not include any pre-configured memory settings.

HOW TO USE A QR CODE:

1. Touch the SCAN TO GO button from the HOME screen in the Dynamite Dashboard App.
2. The camera will open on your device, use this to scan the QR code.
3. When the QR code is scanned it will apply the parameters, press START to begin charging.
