Parachute

ASSEMBLE ENGINE MOUNT

1. Make a mark on engine mount tube **A** 1 in. from end of tube. Cut a slot 1/8 in. wide 2 1/2 in. from end of tube.

2. Insert engine hook **B** into the slot in tube **A**.

3. Apply glue to tube **A**. Slide mylar ring **F** up to 1 in. mark.

4. Apply glue to the inside of tube **A**. Insert engine block **C** until it makes contact with the engine hook **B**.

5. Apply glue to ends of tube **A**.

6. Place centering rings **D** and **E** over the ends of tube **A**.

LET DRY

PREPARE FINS

1. Sand both sides of laser cut balsa sheet. Cut out all **H** and **I** pieces from the balsa sheet.

ATTACH FINS AND LAUNCH LUG

1. Cut out fin alignment guide from page 3.

2. Wrap the fin alignment guide around body tube **G**. Secure in place with tape.

3. Mark all lines from fin alignment guide around body tube **G**. Label the fin lines and launch lug line.

4. Use a door frame as a straight edge to extend the lines on the body tube.

5. Apply glue to root edge of fin **H**.

6. Place fin on the "fin line". Align bottom of fin with end of the body tube.

7. Repeat for all three fins.

8. Apply yellow glue to wood dowel **J** and attach launch lug **K**.

9. Apply yellow glue to body tube on the "launch lug" line. Place launch assembly on the body tube with the wood dowel against the body tube.

NOTE:

Use fin placement guide on page 3 to ensure fins are properly placed and aligned.

INSTALL ENGINE MOUNT

1. Apply yellow glue to inside of body tube.

2. Insert engine mount assembly ensuring the end of the engine mount and end of the body tube aligns.

PAINT AND DECALS

1. Spray rocket with white primer, let dry, and sand. Repeat until rocket is smooth, then paint. Apply decals after paint is dry.
2. Cut decals from sheet, trimming close to edge.
3. One at a time, place in warm water until decal curls and begins to relax.
4. Remove and position on rocket, sliding decal away from backing material.
5. Blot with clean paper towel. Let set overnight.
6. OPTIONAL: Apply protective clear coat.

CAUTION:

See manufacturer's warnings and instructions before using spray finishing products.

NOTE:

Please refer to panel art for painting reference.

PREPARE NOSE CONE

NOTE:

Complete model painting before proceeding with these steps.

1. Screw **L** into the center of balsa payload nose block **M**.

2. Unscrew, apply yellow glue to the hole, and screw back into place.

3. Apply three pieces of die cut tape strips **P** around the opposite end of **M**.

4. Apply three pieces of die cut tape strips **P** around the base of nose cone **O**.

CAUTION:

For safe handling of plastic cement, see manufacturer's warnings and follow instructions for use.

NOTE:

If needed, apply clear tape over base of nose cone for a friction fit inside clear payload tube.

LET DRY

INSTALL SHOCK CORD

1. Cut out shock cord mount from page 3.

LET DRY

ATTACH PARACHUTE AND SHOCK CORD TO NOSE CONE

PREPARE FLIGHT RECOVERY

IF NOSE CONE FIT IS...

NOTE:

Recovery wadding and parachute must slide easily into body tube. If it's too tight, redo.

PREPARE ENGINE

COUNTDOWN AND LAUNCH

PRECAUTIONS

NAR SAFETY CODE

NO DRY GRASS OR WEEDS

PRE-LAUNCH CHECK For safety, never launch a damaged rocket. Check the rocket's body, nose cone and fins. Also, check the engine mount, recovery system and launch lug(s). Repair any damage before launching the rocket.

FLYING YOUR ROCKET Choose a large field (1000 ft. [305 m] square) free of dry weeds and brown grass. The larger the launch area, the better your chance of recovering your rocket. Launch only with little or no wind and good visibility. Always follow the National Association of Rocketry (NAR) SAFETY CODE (enclosed).

MISFIRES TAKE THE KEY OUT OF THE CONTROLLER. WAIT ONE MINUTE BEFORE GOING NEAR THE ROCKET. Disconnect the micro-clips and remove the engine. Take the plug and starter out of the engine. A burned starter means the starter tip was not touching engine propellant. Install a new starter; be sure the tip is touching propellant inside the engine. Push the plug in place. Repeat steps under Countdown and Launch.
